

# Instructions: Drawing a frog

## How to draw a frog

Find a piece of paper  
and a pencil too.

Where's your eraser?  
Keep it close to you.

Draw an oval shape,  
an egg on its side.  
A curve for the nose  
and two round eyes.

Rub away the lines  
that cross behind the eyes.  
Shade two dark ovals  
on the inside.

Now some small dots,  
to make the eyes look good.  
The mouth comes next.  
That's right, it should.

Draw a big smile.  
Start with a line.  
Add a few bumps.  
You're doing just fine.

Open the mouth,  
make it real wide:  
draw a deep curve,  
let the pencil glide.

Eyelids are next,  
first one, then two.  
A tongue, some arms,  
and that will do.

There on the page,  
right in front of you,  
is your little frog,  
the one that you drew.
