

Underground

MAJOR
DRILLING

Major Drilling's underground drilling capability is second to none. We are long time experts in the field and have experience with every conceivable subsurface condition. When required, our underground division can partner with our surface operations to deliver a total service and support package to our clients in any location throughout Australia.

Our reputation for success in underground drilling is well established. Our underground services include diamond core drilling, directional drilling, service holes, geo tech and surveying.

Major Drilling's underground team is made up of **highly skilled and qualified** individuals all of whom hold all relevant industry certifications. Our comprehensive training program ensures the underground team are not only kept up-to-date with the latest technology and innovations in our industry, it means they are skilled to do their very best on the job site every day.

Safety is first and foremost on every Major Drilling employee's mind. Major Drilling provides all the process, physical and training tools to promote and ensure the safety of everyone who works with us. Our safety management program requires safety assessments to be performed on each and every work site. As a result, we have an **outstanding safety record**.

Our **commitment to the environment** is on a par with our commitment to safety. We respect the areas in which we work.

We rely on a **modern fleet** of Longyear rigs for our underground work. Our strict maintenance controls and regular servicing program ensures reliability and continuity of service on the job site, no matter how remote or harsh the conditions. We are constantly investing in our fleet with the size of our business enabling us to **rapidly respond to the market's changing needs**.

Our **superior customer service** sets us apart from our competitors. Our underground teams receive around the clock support from technical and management teams that have hands on drilling experience.

We credit our outstanding achievements and **problem solving capabilities** for attracting some of the industry's biggest players to partner with us to get their underground jobs done. However, we have partnered with businesses of every size and have always satisfied their requirements. Regardless of the client, our focus is on achieving outstanding results in the shortest possible time. This makes us very cost effective.

We take great pride in our workmanship as we work to complete projects on time and on budget, with minimum disruption to the environment and maximum safety for all. Contact us to find out more and to discuss your drilling requirements.

Surface

MAJOR
DRILLING

Major Drilling is a leading provider of specialised surface drilling services to the resources industry. Our cutting-edge drilling technology and our extensive drilling experience set us apart from our competitors. Plus, we can provide a total drilling solution to our clients by combining services from our three drilling divisions – surface, underground and energy.

Our surface drilling team are dedicated to working with accuracy and efficiency. The drilling services we offer on the surface include diamond core drilling, directional drilling, mud rotary, RC, RAB, mine service holes, geo tech and surveying.

We have a proven reputation for success and are proud to have drilled the **deepest hole** in Australia – 3,095 metres NQ (2,000 vertical metres).

At times, we have achieved success on sites when others could not. This is not only because of our highly skilled people and **very large fleet** of first class equipment; it's because of our ability to solve problems and deliver solutions. We are prepared to **go the extra mile** when required to get the job done.

Our experience is broad – we have worked on numerous sites in recent years, for **clients large and small**. Being part of the multi-national Major Drilling Group delivers great peace of mind to our clients. However, on a local scale, we are sized just right to deliver a very personal service. We listen carefully and respond quickly. We have the **flexibility to adapt** to each client's differing local demands.

Our people are very experienced and **highly qualified**. Each person holds all necessary certificates to undertake their role safely and with care and concern for the environment. Our training program is far reaching – it touches every person in our organisation no matter how remote their location, ensuring all staff are up-to-date and in a position to allow Major Drilling to continue to **lead the way**.

Our drilling rigs and support trucks are maintained to the highest standards. Each unit is thoroughly cleaned and serviced before being sent to any work site. Our **backup and support** for these units is exceptional. We have a large fleet of equipment on hand for immediate transfer to site should the job requirements change or if one of the rigs on site goes down. With 95% availability of equipment our turn around times are second to none.

We are constantly investing in our fleet with the size of our business enabling us to **rapidly respond to the market's changing needs**.

When in the field, our surface teams strive to minimise cost and optimise production. This makes it very cost effective to do business with us. Contact us to find out more and to discuss your drilling requirements.

Energy

MAJOR
DRILLING

Major Drilling has been meeting the needs of the coal seam gas (CSG) and energy industry for almost 10 years. During this time we've proudly drilled holes with unmatched speed and accuracy. Our ability to outperform our competitors extends across our business and into our surface and underground divisions. Not only are we ideally placed to meet your total drilling needs, our performance is difficult to beat.

Our energy drilling team are well known for their outstanding results on site whether they are contracted to undertake CSG laterals, production wells, chipping / rotary, coring or surveying.

We are **pioneers in lateral CSG drilling** in Australia and our success has grown from our continual focus on efficiency, cost effectiveness and outstanding customer service.

Our energy drilling teams are **unmatched in their experience** – our top five steerers have over 42 years combined experience on the job. These experts act as mentors to our less experienced team members, ensuring their valuable skills and experience are not only passed on, they are embedded within the culture of our organisation.

Our training program is comprehensive, all certifications are up-to-date and every team member is not only aware of the **latest developments** in our industry, they are skilled to implement new initiatives to the advantage of our valued clients.

The safety of our staff and the people with whom they work is our number one priority. Our safety standards are adhered to and our **safety record is outstanding.**

Our concern for safety is equalled by our **concern for the environment.** Major Drilling has a zero tolerance policy to environmental incidents. Our goal is to get on site, get the holes drilled and get off again as quickly as possible, leaving no sign that we were even there.

We are constantly investing in our fleet with the size of our business enabling us to **rapidly respond to the market's changing needs.** We purchase additional rigs and equipment as required and our fleet is amongst the best maintained in our industry which means its performance is reliable.

We are proud to have worked with some of the biggest names in our industry, and equally as proud to have worked with some of the smaller ones too. We have achieved **positive outcomes** in each and every client relationship, many of which have been longstanding.

Major Drilling has the resources and commitment – and the proven track record – to deliver success in energy drilling no matter what your requirements are. Contact us to find out more and to discuss your drilling requirements.
